# EER diagram

Logistic Constraints

1) Store names must be alphaneumeric characters so if a store has a ! or anything special (&), the ERD would not know what to do with it.

2) A drone cannot be assigned a delivery until the previous delivery is completed.

3)PLU number must be a unique, 5-digit integer for each item/chain combination.

4) The credit card expiration date needing to be later than the current date.

5) Technicians can only see drones from the zip code that they work in.

6) Password must be at least 8 letters.

7) An employee cannot register as the chain manager of a chain that already has a chain manager.
